SUMMARY

Product manager who took LG Energy Solution from battery racks to a prefabricated containerized ESS, partnering with Jabil on the first product. Senior product manager for grid-scale BESS with 8 years in lithium-ion storage, from deal engineering to product line ownership. Licensed Professional Engineer with an MBA in product strategy.

EXPERIENCE

LG Energy Solution | Senior Product Manager, Grid-Scale BESS Feb 2018 – present

- Partnered with Jabil to standardize and prefabricate LG's first modular containerized ESS, replacing bespoke on-site integration by system integrators.
- Designed LG's first pre-integrated 2.86 MWh battery container with Jabil.
- Deployed the standardized container at 584 MWh on Fifth Standard in California and 361 MWh on Bright Arrow in Texas.
- Made the case for a 2-hour AC-integrated BESS when LG planned to stay at 4-hour duration.
- Led product development (NPI) of the 2-hour container, now LG's flagship for AI data centers, with about 3 GWh booked for 2027.
- Lead product strategy for grid-scale battery storage sold to hyperscale AI data center customers, including Meta, Google, NVIDIA and Microsoft.
- Set the fire safety requirements for the container while the industry was still defining how to prove them.
- Modeled product cost from cell cost through system selling price, plus customers' EPC and installation cost.

Comfort Energy | Design-Build Engineering Manager, HVAC July 2016 – Oct 2017

- Managed sales, design and project management of commercial and luxury residential HVAC projects from proposal through engineering, construction and startup.
- Exceeded the department's annual project sales goal of \$2M.
- Designed HVAC and hydronic systems using building energy modeling, equipment sizing and duct and piping layouts to code.

Pacific Gas and Electric | Energy Solutions Engineer Dec 2013 – July 2016

- Developed energy-efficiency and demand-response projects for commercial and industrial customers under statewide incentives, including cogeneration, thermal energy storage and battery peak-shifting.
- Generated cumulative savings of 2,500 kW and 7 million kWh, helping the company exceed its energy-savings goal through field audits.

SELECTED PROJECTS

- **MBA Honda IMPACT Project:** Built a five-year go-to-market plan for Honda to launch hydrogen fuel cells, electrolyzers and second-life EV batteries into the US C&I market.
- **Institutional Research Pulse Bot:** Shipped a multi-agent system that ingests 100-200 analyst reports daily and delivers a daily Market Pulse research brief to a paying customer.

EDUCATION

MBA (STEM-designated), Product Management/Strategy, UC Davis Graduate School of Management, 2022

BS Mechanical Engineering, UC Davis, 2013, Dean's Honor List

CERTIFICATIONS

California Licensed Professional Engineer #M38303, Thermal and Fluid Systems (NCEES, 2016)

SKILLS

BESS: power conversion systems (PCS), thermal systems, codes & standards (UL, NFPA), fire safety, testing & certification, lithium-ion system design, BMS

Grid & Utility: interconnection, demand response, energy efficiency, US energy markets (ERCOT), electricity financial contracts (forwards, tolling, swaps)

Product & Commercial: NPI, product strategy, market requirements, competitive analysis, contract negotiation, financial modeling, proposal tendering, VOC, US GAAP

Software & Analytics: Python, SQL, Tableau, MATLAB, FastAPI, GitHub Actions, Docker, Anthropic API, MCP
