SUMMARY

Senior product manager for grid-scale BESS at LG Energy Solution, with 8 years in lithium-ion storage from deal engineering to product line ownership. Sells to AI data center customers including Meta, Google, NVIDIA and Microsoft, and to front-of-meter grid storage developers. Licensed Professional Engineer with an MBA in product strategy.

SKILLS

BESS: power conversion systems (PCS), power electronics, lithium-ion system design, fire safety, codes & standards (UL, NFPA), testing & certification, techno-economic analysis, system sizing, degradation/thermal modeling

Grid/utility: AI infrastructure power, interconnection, energy efficiency, demand response

Product & commercial: product strategy, product development, strategic partnerships (Jabil), market requirements, competitive analysis, contract negotiation, financial modeling

EXPERIENCE

LG Energy Solution

Feb 2018 – present

Senior Product Manager, Grid-Scale BESS

Feb 2021 – present

- Own product strategy, requirements and business cases for LG's grid-scale BESS line, sold to AI data center and front-of-meter customers.
- Replaced bespoke on-site integration, the market's biggest pain point, with LG's first prefabricated 2.86 MWh ESS container, built with Jabil.
- Deployed 584 MWh on Fifth Standard in California and 361 MWh on Bright Arrow in Texas with the standardized container.
- Won approval for a 2-hour AC-integrated BESS, against a plan to stay at 4-hour, with a techno-economic business case.
- Booked about 3 GWh for 2027 on the 2-hour product, now LG's flagship for AI data centers.
- Achieved UL 9540 listing for the container, setting fire safety requirements and running hazard mitigation analysis and deflagration CFD with fire consultants.

Senior Systems Engineer, Energy Storage

Feb 2018 – Feb 2021

- Owned the technical side of North American battery sales deals, from sizing and degradation modeling to contract exhibits.
- Cut proposal turnaround from days to hours with battery modeling tools for degradation, thermal and augmentation optimization.

Comfort Energy

July 2016 – Oct 2017

Design-Build Engineering Manager, HVAC

- Ran commercial and luxury residential HVAC projects end to end, from customer relationship and site walk to commissioning and startup.
- Exceeded the department's \$2M annual sales goal on commercial and luxury residential projects.

Pacific Gas and Electric

Dec 2013 – July 2016

Energy Solutions Engineer

- Worked directly with commercial and industrial customers to identify, quantify and win incentives for energy-savings capital projects.
- Generated 2,500 kW and 7 million kWh of cumulative savings across commercial and industrial efficiency projects, helping PG&E exceed its goal.

SELECTED PROJECTS

- **MBA Honda IMPACT Project:** Built a five-year business plan for Honda to launch hydrogen fuel cells, electrolyzers and second-life EV batteries into the US C&I market.

EDUCATION & CREDENTIALS

MBA (STEM-designated), Product Management/Strategy, UC Davis Graduate School of Management, 2022

BS Mechanical Engineering, UC Davis, 2013, Dean's Honor List

California Licensed Professional Engineer #M38303, Thermal and Fluid Systems (NCEES, 2016)
