SUMMARY

Senior product manager for grid-scale battery storage sold to AI infrastructure and datacenter operators including Meta, Google, NVIDIA and Microsoft. Designed LG's first pre-integrated battery container, 2.86 MWh, coordinating engineering across battery, enclosure, PCS, controls, HVAC and fire systems. Licensed Professional Engineer, MBA in product strategy, 12+ years across BESS, utility grid and energy finance.

EXPERIENCE

LG Energy Solution | Senior Product Manager, Grid-Scale BESS Feb 2021 – present

- Lead product strategy and commercialization for grid-scale battery storage systems targeting AI datacenter customers, including Meta, Google, NVIDIA and Microsoft.
- Manage new product development for grid-scale ESS and data science products, covering strategy, voice of customer and market requirements.
- Analyze the competitive landscape to prioritize product and market requirements for grid-scale storage lines.
- Run the engineering program for battery, enclosure, PCS, controls, HVAC, fire suppression and balance of plant systems.

Pacific Gas and Electric | Senior Grid Innovation Engineer June 2023 – present

- Manage PG&E's Integration Capacity Analysis platform, the interconnection and hosting-capacity data system, with its vendors and contractors.
- Develop business cases and secure management approval for internal products, including a non-wires alternatives planning tool.
- Author reports and deliver presentations for regulatory compliance and communication with regulators.

LG Energy Solution | Product Manager, Grid-Scale ESS Feb 2021 – 2023

- Designed LG's first pre-integrated battery container, 2.86 MWh.

LG Chem | Senior Systems Engineer, Energy Storage Feb 2018 – Feb 2021

- Improved proposal turnaround time by building battery modeling tools for degradation, thermal and augmentation optimization.

Comfort Energy | Design-Build Engineering Manager, HVAC July 2016 – Oct 2017

- Managed sales, design and project management of commercial and luxury residential HVAC projects, exceeding a \$2M annual sales goal.

Pacific Gas and Electric | Energy Solutions Engineer Dec 2013 – July 2016

- Generated cumulative savings of 2,500 kW and 7 million kWh across commercial and industrial energy-efficiency projects.

SELECTED PROJECTS

- **MBA Honda IMPACT Project:** Built a five-year business plan for Honda to launch hydrogen fuel cells, electrolyzers and second-life EV batteries into the US C&I market.

EDUCATION

MBA (STEM-designated), Product Management/Strategy, UC Davis Graduate School of Management, 2022

BS Mechanical Engineering, UC Davis, 2013, Dean's Honor List

CERTIFICATIONS

California Licensed Professional Engineer #M38303, Thermal and Fluid Systems (NCEES), 2016

SKILLS

BESS & Power Systems: BESS, power conversion, PCS, BMS, lithium-ion system design, degradation/thermal modeling, system sizing, techno-economic analysis, fire safety

Product & Commercial: product strategy, market requirements, business case development, competitive analysis, voice of customer, contract negotiation

Grid & Utility: interconnection & hosting capacity (ICA), non-wires alternatives, US energy markets (ERCOT), electricity financial contracts (forwards, tolling, swaps), energy efficiency, demand response

Software/Data: Python, SQL, Tableau, statistical forecasting, linear/non-linear optimization, multi-agent orchestration
